- Provided a space for an immersive exploration of French language and francophone culture.
- Developed projects designed to promote a complex awareness of culture and current events.
- Led adult conversation course exploring current political, economic, and civil topics.

Professional Goals

There's nothing that I find more satisfying than identifying problems and finding effective and efficient ways to solve them. I was thrilled to discover the world of Computer Science, even though it was already late in my senior year at Carleton College. Since then, I've become an impassioned autodidact, learning to use many technologies to make life easier at work and at home. My position at FluentU has given me the opportunity to develop my skills and put them to work for the company. Now I'm ready to take the next step and dive into the world of programming. I'm certain that my dedication and ability to learn quickly will make me an excellent developer and a valuable employee.

Skills/Accomplishments

- HTML, CSS, jQuery, JavaScript proficient
- Some experience using Python, Swift, Objective-C, C, Ruby on Rails, AngularJS, Express.js, and Bootstrap
- DECA Economics & Marketing Competitions (2-time top 10 national qualifier)
- Fluent in French and Spanish
- Recipient of the Jean Schmidt prize for "enthusiasm for learning and love of people."
- 3 years studying at music conservatories in France and Belgium for classical trumpet performance.
